

# KITCHEE launches on the App Store

## AI app turns fridge photos into dinner

*AI-powered cooking assistant that turns a fridge photo into a ready-to-cook recipe in about 60 seconds.*

October 13, 2025

**Kitchee**, a new AI-powered cooking app for iOS and macOS, helps home cooks turn a single photo of their fridge or prep area into a step-by-step dinner plan in about 60 seconds.

By combining visual ingredient detection with culinary reasoning, Kitchee suggests complete meals that match the ingredients users already have.

To help you save and digitize family recipes, Kitchee can transform a single scan of a handwritten recipe into a clear, formatted version with steps and an ingredient list.

Kitchee supports metric and imperial units, dietary filters (vegan, gluten-free, low-carb), and privacy-minded defaults.

A free tier lets new users try the core experience, while subscriptions unlock faster generation and advanced features.

As a native Apple ecosystem app, Kitchee gives users easy ways to import and share recipes in various formats commonly used across the food and recipe industry.

Kitchee is available now on the App Store for iPhone, iPad, and Mac, with additional platform support such as Android planned for 2026.

### **Main features:**

- Fridge-to-Recipe flow: Snap a photo, select your preferences, and get a complete, cookable plan.
- Recipe scanning: Digitize handwritten recipes into clean, editable steps.
- Hands-free mode: Use timers and voice control (iOS) to cook without touching your screen.
- Apple-native design: Unified experience across iPhone, iPad, and Mac with automatic sync.
- Privacy-first: Minimal data collection, no ads or tracking.

### **Pricing:**

- Free — Core fridge-to-recipe flow; 5 AI-generated recipes per month.
- Premium — 40 recipes per month; interface customization.
- Premium+ — 100 recipes per month; early access to experimental features; priority support.

### **Developer:**

Oliver Herbelin, solo developer, passionate cook.

Tired of ad-ridden recipe sites, he built Kitchee to make home cooking faster, smarter, and joyful again.

### **Now available on the App Store**
